

Company Overview

Swartek Corporation is a **Data & AI driven technology firm** specializing in advanced analytics, data engineering, and application modernization. We help federal agencies transform legacy systems into automated, data-driven platforms that enable real-time, mission-critical decision-making. As an SBA-certified 8(a), ISO 9001:2015, and CMMC Level 1 compliant organization, Swartek delivers secure, scalable, and outcome-driven solutions aligned with federal mission needs.

NAICS Codes: 541511,541512,541513,541519,541611,541330,541990
Contract Vehicles: GSA Schedule - 54151S Contract # 47QTCA22D0090
 8(a) sole source.

Key Clients & Past Performance

National Science Foundation (NSF): Delivered enterprise Data & AI platforms and analytics solutions, enabling real-time insights, reporting, and mission-critical decision-making.

Modernized grants applications using Agile and DevSecOps, leveraging AI-driven tools to accelerate delivery, improve efficiency, and enhance application performance.

Department of Homeland Security (DHS): Delivered data integration, analytics, and business intelligence solutions to enhance procurement operations, improving reporting accuracy, visibility, and decision-making.

WELLS FARGO Delivered enterprise Generative AI and agentic AI solutions to automate workflows and enable intelligent decision support. Integrated LLMs with enterprise data to improve efficiency and secure, scalable operations.

Developing next-generation API and data integration platforms using MuleSoft, Salesforce, and AWS to enable real-time data exchange and scalable, data-driven operations.

Other Clients

Core Capabilities

Data Analytics & AI

End-to-end data and AI solutions, including data engineering, advanced analytics, AI/ML, and business intelligence to enable real-time insights and mission-critical decision making.

App. Development & Modernization

Modernization of legacy systems and development of data-driven, API-enabled applications using microservices and cloud-native architectures.

Enterprise Platforms

Integration and modernization of enterprise platforms (ServiceNow, Salesforce, Oracle, PeopleSoft) with data, APIs, and cloud capabilities to enable efficient operations.

DevSecOps & Agile Development

Full lifecycle Agile and DevSecOps enabling secure, automated, and rapid delivery of scalable applications and data platforms.

Cloud Migration and Integration

Cloud-native development and migration of applications and data platforms across AWS, Azure, and hybrid environments.

Agile PMO and IT Advisory

Program management, Agile governance, and IT advisory services, including training and enablement to support successful delivery of modernization initiatives.

Differentiators

- Outcome-focused delivery enabling real-time insights and operational efficiency.
- Expertise in modernizing legacy processes into automated, scalable platforms.
- Experience delivering audit-ready, compliant solutions (CUI, NIST, CMMC).
- Ability to support concurrent operations and modernization with minimal disruption.
- Agile and DevSecOps approach enabling secure, scalable, and rapid delivery.
